WHY ATTEND

More than 20,000 people from over 100 countries attended our 2015 conference.
Here's what's in store for IPM Day 2016:

Networking and engagement

Take part in live Q&A with keynote speakers, chat with attendees, and visit sponsor booths.

Exceptional content and speakers

Choose from dozens of keynotes and video presentations from experts in their fields.

Bonus access to two on-demand courses

- Stakeholder Relationship Skills
- Managing Project Scope

Valuable professional development

Earn Up to 30 PDUs to maintain PMI certification, aligned with the Talent Triangle

On-demand conference access

Attend on demand for 90 days after the live conference on November 3rd.

Great takeaways

Download presentation slides, templates, white papers, and other resources.

ABOUT IPM Day

Decades ago, the futurist Alvin Toffler predicted a “roaring current of change” that would challenge the very structure of institutions. Thanks to an uncanny ability to peer over the cultural horizon, Toffler knew the digital revolution was imminent—and it would be hugely disruptive. Look around. For almost any industry today the only reasonable survival strategy is to embrace change. And if you look hard enough, all this change is happening through projects.

Projects drive change, and project managers are the agents of change.

An organization's success in this environment requires agility at many levels: from trying new development approaches (e.g., Scrum); using new team collaboration tools; and, a willingness to experiment and celebrate failure. In other words, game-changing approaches to our world of work.

IPM Day 2016 brings you the very best speakers on the front-line of this “roaring current of change” who will provide insight, commentary, and guidance on making you the best change agent you can be.
